• Asire ki prosedir permi spesyal pou transpor lo Ladig i pour en aktivite ekonomik ki zwe en rol primordial pour developman Ladig e benefisy bann digwa.

• Sovgard e protez por maritim, kontinyelman amelyor e agrandi bann fasilit ek lenfraziskir pour reponn avek efikasite bann bezwen developman, inovasyon teknoz dan por ek transportatyon maritim avek bi donn en servis efisyen pour fasilit komers, lendistri tourizm, lapes e siport bann lobzekatif lekonomi ble.

DEVELOPMAN FIZIK

• Kontrol developman lo Ladig atraver lezislasyon en plan amenazman later e bann gid pou developman fizik.

• Asire ki tou devloman le fitir ek aktivite ekonomik i enkorpor e pran an kont frazilite lanvironnan Ladig, ki ava ede promot lizaz bann pratik soutenab ek teknoz ekolozik dan konstriksyon.

• Ranplas polisi ki restrikte developman par lao lalinny kontour 50 met avek nouvo polisi pou klasifikasyon later ki osi pa konsider developman dan bann landrwa ki annan en ekosist-

enm ki sansib. Kontrol bann developman dan landrwa kot teren i favorab pour developman.

• Annan en plan amenazman later ki azour e ki enkorpor ban gid pou developman lo lakot.

• Protez bann sit touristik egzistan e fitir. Mentreng grader later en minimonm sis san met kare pour novo developman touristik.

• Identife bann novo sit pour developman touristik espesyalman pour bann aktivite ekotourizm.

• Permet konstriksyon batiman ziska en oter 2 letaz maksimonm

• Kontrol developman lo montanny atraver en gid e asire ki konstriksyon lo montanny i ganny restrikte; ki napa okenn letaz.

• Grander en batiman pou ganny determinen par klasifikasyon itilizasyon later e poursantaz later ki kapab ganny devlope asosye avek sa klasifikasyon.

CULTURE & HERITAGE

• Preserve and promote La Digue's traditional architecture and give more value to traditional 'plantation style'

• Ensure that old buildings with architectural values are listed and given necessary protection.

• Build on and promote the strong sense of tradition and 'Savoir Vivre' that still exist on the island.

• Ensure that traditions and 'Savoir Faire' is passed on to the new generations by establishing platforms for the elders to inculcate knowledge and skills in traditional music, dance, gastronomy, crafts, boat making and others.

• Create more awareness of and promote the economic values of the island's historical and cultural heritage.

TRANSPORT

• Encourage green transportation for La Digue by promoting the cultural value of walking, bicycle riding and ox-cart as a means of transportation and touristic attraction.

• Maintain and monitor the quota on conventional motorised vehicles on La Digue and encourage the shift towards more energy efficient and sustainable motorised vehicles.

• Implement the strategic replacement of all conventional motorised vehicles on La Digue with environmentally friendly motorised vehicles e.g. electric or hybrid.

• Design and construct roads that are in harmony with the visual and aesthetic aspects of the island but that also responds to the growing diverse traffic needs.

- Establish procedures for each category of transport service on La Digue including omnibus service, ox-cart, taxis, camions and electric buggies, heavy vehicles and machinery.
- Establish good road safety practices on La Digue.
- Procedure for vehicle special permit for La Digue is for an economic activity which plays an active role in the development of La Digue and benefit Diguois.
- Safeguard the maritime gateway by continuously upgrading and expanding port facilities and infrastructure to effectively respond to development, growth and innovations in port and shipping technologies with the aim of providing modern and cost effective facilities, infrastructure and efficient services to facilitate trade, tourism, fisheries and support the Blue Economy objectives.

PHYSICAL DEVELOPMENT

- Control development on La Digue through a legislated Land Use Plan and physical development guidelines.
- Ensure that future developments and economic activities incorporate and take into account the environmental fragility of the island and promote the usage of sustainable, green practices and technologies in construction.

- Replace the 50metre contour line policy with new land classification which considers non development in sensitive ecosystems and controlled development in areas of favourable terrain for development.
- Have an up to date Land Use Plan that incorporates the foreshore guidelines.
- Protect existing and future tourism sites. Maintain a minimum plot size of 600sqm for new tourism developments.
- Identify new sites for tourism development especially eco-tourism activities.
- Allow building heights of ground plus 1 plus attic or ground plus 2.
- Development on hill slopes will be controlled by a guideline and uphill development on hill slopes will be restricted to ground floor level only.
- Footprint size of buildings will be determined by land use classification and associated plot coverage limit requirements.

SEKTER KILTIR E LERITAZ

- Prezerv e promot larsitektir tradisyonnell Ladig e donn valer bann grann kaz tradisyonnell.
